SETI Scan on 3/12/14 ([spc00455_20140312_115423 - JA](#))

SETI Analysis

A. Interference Signals:

Star freq. (MHz)	End Freq. (MHz)	Start Time (sec)	End Time (sec)	Comments
170.0244	170.0245	0	3700	Constant signal -- likely interference
70.02441	70.024415	0	3700	Constant signal -- likely interference
.009	.029	0	3700	Constant signal -- likely interference

B. Possible Instrumental noise or interference:

Star freq. (MHz)	End Freq. (MHz)	Start Time (sec)	End Time (sec)	Comments
110.4	152.7	1254	1257	A possible but unlikely source; it is spread over to many frequencies

C. Candidates: We did not observe any signals that are possible candidates on this scan.
